Statement by DBEDT Director James Kunane Tokioka:

The visitor statistics indicate that our tourism industry continues to be soft. The main reasons for the weakness include the continued impact of the Maui wildfires and the shift of U.S. and Canadian visitors to other international destinations due to currency appreciation. The currency situation is expected to improve when the Federal Reserve starts to cut interest rates during the second half of 2024.

We are pleased to see the Japan market and other international markets continue to recover during the first two months of this year. With Governor Green's most recent trip to Japan to strengthen tourism opportunities in partnership with the U.S. government, the Japanese government, and the private sector, we are optimistic about the outcomes to support travel and economic growth for Hawaii and Japan.
